# Center for Disabilities and Development LEND Training Program

Leadership Education in Neurodevelopmental and Related Disabilities (LEND) programs provide graduate level interdisciplinary training as well as interdisciplinary services and care. The purpose of the LEND training program is to improve the health of infants, children, and adolescents with disabilities. They accomplish this by preparing trainees from diverse professional disciplines to assume leadership roles in their respective fields and by insuring high levels of interdisciplinary clinical competencies.

We have a stipended internship placement for a Public Health student to become a LEND trainee beginning in the Fall of 2009. CDD Iowa's premier disability resource has had public health trainees since 1999 from the College of Public Health learning along side a wide range of clinical health trainees. Call for more information and a tour of CDD.
