CPH Student Internship

Community Profile – Muscatine County Target Area
Needs and Gap Fulfillment

Organizational Information

Name of Organization: **Quad Cities Affiliate of Susan G Komen for the Cure**

Project Information:

The Quad Cities Affiliate of Susan G Komen for the Cure and The University of Iowa College of Public Health team are currently in the process of completing the FY11 Community Profile of the Quad Cities eight county service area. Through quantitative analysis of mortality and incidence rates of breast cancer as well as a health system analysis, Muscatine County was identified as a target community for in depth study. Community information was collected through questionnaire/survey, key informant interviews, and focus groups. Qualitative analysis is being assessed to identify needs and gaps being experienced in Muscatine County. It is the intention of the project to continue to work in Muscatine County by increasing breast cancer awareness and education thus addressing the needs and closing some of the gaps. As part of the project, development of supporting material to the Community Profile to visualize a quick look at the area assessment would be instrumental in visualizing the needs and gaps currently present. Providing breast cancer awareness to the community is crucial but it is also necessary to convey those needs and gaps to the providers and individuals who have the ability to help close them. We can all create a difference; we can all make an impact.
