

SPRING 2018 COURSE: GLOBAL ROAD SAFETY

Road traffic injuries are rising in the death ranks worldwide. Deaths from road traffic crashes are expected to rise to the 7th leading cause of death by 2030 for all ages and are currently the leading cause of death for 15-29 year-olds. Road traffic crashes account for over 1.25 million deaths and 20 million non-fatal injuries annually around the globe.

This course will introduce you to road safety problems, data sources, research methods used in the field, and how intervention and prevention programs are developed and evaluated.

3 s.h. course offered
Spring 2018

Global Road Safety
OEH 4530/ CPH 4220/
GHS 4530

Tuesdays and
Thursdays
12:30-1:45PM
216 Phillips Hall (PH)

You will learn skills that will set you apart, including geomapping, policy development, and technology used in traffic studies. You will adopt a country for the semester and learn in-depth about that country's road safety.
