B. Personal Statement

Dr. Thorne is the Director of the Environmental Health Sciences Research Center and Director of the UI Pulmonary Toxicology Facility. He has served as PI of many pulmonary biology and inhalation toxicology studies of biological and therapeutic agents. He has performed extensive research using in vitro and whole animal models to elucidate mechanisms of responsiveness to inhaled agents and the generation of aerosols for gene delivery. Dr. Thorne's laboratory has worked to characterize the environmental influences on the progression of lung diseases. His Pulmonary Toxicology Facility provides facilities and training for carrying out studies on gene delivery and pulmonary host defense in animal models and in vitro systems with exposure at the air-liquid interface. Dr. Thorne also has extensive experience leading community-based participatory research and translating science to the public. Since 2000 Dr. Thorne has mentored 75 junior faculty, graduate students and post docs and served on 50 thesis committees.
