Accountable Care Organizations, Health Insurance Exchanges and Rural Primary Care Providers

Presentation to the National Rural Task Force
August 2, 2011
Washington, DC

Keith J. Mueller, Ph.D.
Director, RUPRI Center for Rural Health Policy Analysis
Head, Department of Health Management and Policy
College of Public Health
University of Iowa
The Changing Landscape

- $$ must be squeezed out!!!
- **Both** price and quantity of services must be reduced
- Changes in the delivery system, fundamental not cosmetic
- PRESSURE TO GROW AND SUSTAIN PATIENT VOLUME
Coincidental Presence of Models for Change (new and old)

- Prevention
- Community Health
- Bundled payment
- Value based purchasing
- Accountable Care Organizations
The future is NOW in many places

- Private action: Brookings-Dartmouth learning sites, Premier, CIGNA, Others
- Public Sector: Beacon communities, Practice Group Demonstrations, Medicaid, Medicare
- Urban based, FOR NOW
- But reaching beyond: Carilion System in Virginia
The National Map: Constructed by the ACO Learning Network

Looking back: the obvious progress
Many moving forward with ACOs

ACO
ACCOUNTABLE CARE ORGANIZATION LEARNING NETWORK

Private Sector
★ = Brookings-Dartmouth
★ = Premier
★ = CIGNA
★ = AQC (9 organizations in MA)
★ = Other private-sector ACOs

Public Sector
○ = Beacon Communities
○ = PGP, MHCQ

www.acolearningnetwork.org
So, we need these conversations

• “Spread” is critical to those who are driving change
• Including rural specific language in the Affordable Care Act
• Systems that buy rural presence
• Lives, volume, lives
Pursuing a Greater Good

- Affordable care
- Access to high quality care
- And being held accountable
While maintaining the enterprise

- Mission matters
- Payment formulae matter
- Community orientation matters
Moving forward

- What are the preparatory activities?
- What can we learn from the policy activities?
- What should be done to prepare to succeed?
Lessons From Large Organizations: Scott & White attributes of Ideal Systems

- Information continuity
- Care coordination and transitions
- System accountability
- Peer review and teamwork for high-value care
- Continuous innovation
- Easy access to appropriate care
Eight Rural Constraints

- Rural provider autonomy
- Rural practice design
- Low rural volumes
- Historic rural efficiency
Continued

- Urban motivations
- Urban provider cost structure
- Legal and regulatory barriers
- Rural leadership inexperience
Strengthening Rural Provider Roles

- Developing rural provider networks in better negotiation postures
- Understand large health system motivations
- Adopting best practices in clinical management
- Help develop rural-relevant ACO performance measures
Rural Providers in the Proposed Final Rule

- CAH: Method 1 Payment may participate, not form
- CAH: Method 2 Payment may form
- FQHC and RHC may not form, can participate in multiple ACOs
- Physician Group Practices can form, or participate in, only 1 ACO
Quality Measures in Proposed Rule

- 65 measures in 5 domains: must report all
- Meet benchmarks, either improvement or threshold
- 50% of physicians must meet meaningful use
Savings ??

- CMS keeps 2% of savings off the top
- Must achieve minimum savings, 3.9% in ACO with 5,000 beneficiaries
- Share 50% in one-sided model, 60% in two-sided
Savings ??

- Additional savings shared if RHC and/or FQHC participate; 2.5% in one-sided; 5% in two-sided
- Small ACOs share on first dollar basis
Anti-Trust in the Proposed Rule

- A 30% threshold for any review
- For each service line
- Can include rural hospital on non-exclusive basis
RUPRI Comments on CMS Proposed Rule

- Attribution of patients, using “physician directed care”
- Allow RHCs to begin reporting systems to enable them to receive assigned patients
- Change minimum savings ration (MSR) to a ceiling of 3.0%
- Extend “under performing” ACOs for an additional 3 year contract, with 40% sharing
RUPRI Panel Comments to FTC

- Use RUCAs to define rural, the adjustment to OMB metropolitan definition
- Define rural hospital using RUCA places
- Extend rural Exception and Dominant Provider Limitation to primary care providers are exclusive to one ACO-MSSP
- Rural exception should include “practice” as well as “physician”
Some take away messages

- Change in delivery systems with payment differences to follow from that
- Findings from Brookings-Dartmouth demonstrations instructive (presented by Elliott S. Fisher, MD, MPH, ACO Learning Network): Independence is a key element of MD identity, shared identity fosters cooperation within collaborative model, transparent measurement, payment for improvement, shared risk using sound actuarial principles.
Take away messages

- CHANGING THE FUNDAMENTALS OF THE SYSTEM IS NOT EASY WORK!
- All about the triple aim
- THE REWARD IN PATIENT CARE IS WORTH THE EFFORT!
Health Insurance Exchanges

- 13 states have enacted legislation establishing exchanges
- Detail varies considerably
- Proposed rule has been published, comments close September 28
Major considerations for HIEs

- Governance
- Enrollment
  - Navigator program
  - Access through broadband services to website
  - Potential provider burden
More Considerations

- Certification of Qualified Health Plans
- Boundaries of exchanges, rating areas
- Extent of managing the market
- Small business health options program (SHOP)
