Service Delivery to Rural Elderly: Creating and Using a System of Care

Keith J. Mueller, Ph.D.
Director
RUPRI Center for Rural Health Policy Analysis
University of Nebraska Medical Center

Presentation at the
NCOA-ASA Joint Conference
March 15, 2003
Chicago, Illinois
Will Present:

- Policy Questions
- Answers
- Practices
- Policy Implications
Policy Questions:

1. What are the implications of the changing composition of the rural population?
Change in Age 65 and Older Cohort (1990 - 2000)

Source: US Census, 2000
Change in Age 65+ Cohort
(1990 - 2000)

Source: US Census, 2000
Diversity, 2000
Hispanic or Latino Origin and All Races

The diversity index reports the percentage of times two randomly selected people would differ by race/ethnicity. Working with percents expressed as ratios (e.g., 50 percent = 0.50), the index is calculated in three steps:
A. Square the percent for each group. B. Sum the squares, and C. Subtract the sum from 1.00.

Eight groups were used for the index: 1. White, not Hispanic; 2. Black or African American; 3. American Indian and Alaska Native (AIAN); 4. Asian; 5. Native Hawaiian and Other Pacific Islander (NHPI); 6. Two or more races, not Hispanic; 7. Some other race, not Hispanic; and 8. Hispanic or Latino. People indicating Hispanic origin who also indicated Black, AIAN, Asian, or NHPI were counted only in their race group (0.5 percent of the population). They were not included in the Hispanic group.

Diversity index by county

High diversity

0.60 to 0.77

0.49 to 0.59

0.40 to 0.48

0.30 to 0.39

0.20 to 0.29

0.15 to 0.14

Low diversity

0.10 to 0.29

0.07 to 0.29

U.S. diversity

0.49 to 0.73

0.30 to 0.48

0.07 to 0.29

Data Source: U.S. Census Bureau, Census 2000 Redistricting Data (PL 94-171) Summary File 2.

Cartography: Population Division, U.S. Census Bureau, American FactFinder at factfinder.census.gov provides census data and mapping tools.

Counties with Increase in Hispanic Population of 100 Percent or More, 1990-2000

Map Prepared by RUPRI

Nonmetro (1,176 Counties)
Metro (402 Counties)
Policy Questions:

2. Given the anticipated demand for services from the elderly, what is the most cost-effective means of responding to that demand?
Cost pressures in Medicare and Medicaid:

- Home Health
- Skilled Nursing Care
- Home and Community Based Services
Policy Questions:

3. What level of government should respond to the demand, and how?
- National: Medicare payment policies, demonstration projects
- State: Medicaid payment policies, waivers, special programs such as grants to convert to assisted living
- Local: Support for community based efforts
- Not-for-profits: Development of community based efforts
Policy Answers:

1. Need to plan for the population changes
■ Building capacity

■ Generating the workforce
Policy Answers

2. Assessment of options
The evaluation component of demonstration and evaluation

- Assessment of needs among the elderly
- Assessment of capacity
- Cost-effective ways of generating capacity
- Public-private partnerships will be crucial
Policy Answers

3. We will be using devolution, locally-based approaches
- Expanded waiver authority in existing Medicaid
- Interest in increased role for private plans in public programs
- Medicare initiatives defined by states and regions
- Services are locally-based
Practices:

- Colleagues in this symposium presenting specifics
- Working through rural health networks
- Diffusion of innovation
- Models that Work
- Continued research years after the initial project
Policy Implications:

- Align incentives
  - changes in practice
  - changes in payment
- Promote innovation
  - demonstration projects sponsored by the federal government
- Regulatory flexibility
Policy Implications:

- Adopt new philosophies
  - caretaker to health promotion
  - centralized organizations to amoebic collaboratives
  - public entities to public-private partnerships
- New populations as a positive
  - sustaining quality of life is an economic gain
  - training new minorities
  - workforce from the elderly
