

## BIOGRAPHICAL SKETCH

Provide the following information for the Senior/key personnel and other significant contributors.  
Follow this format for each person. **DO NOT EXCEED FOUR PAGES.**

NAME <b>Casteel, Carri</b>	POSITION TITLE  <b>Associate Professor</b>		
eRA COMMONS USER NAME (credential, e.g., agency login) <b>ccasteel</b>			
EDUCATION/TRAINING <i>(Begin with baccalaureate or other initial professional education, such as nursing, include postdoctoral training and residency training if applicable.)</i>			
INSTITUTION AND LOCATION	DEGREE <i>(if applicable)</i>	MM/YY	FIELD OF STUDY
University of California, Irvine University of California, Los Angeles University of California, Los Angeles	BS MPH PhD	06/92 06/96 12/01	Mathematics Epidemiology Epidemiology

### A. Personal Statement

The overall objective of the proposed translational research study is to demonstrate how evidence-based practices for older adult falls prevention adapted in clinical settings can be effectively delivered by healthcare providers to improve uptake and reduce the rate of falls and fall-related injuries among older adult participants. My experience in conducting translational research studies, including studies with older adult populations, positions me well to successfully contribute to the proposed work. I led a dissemination study to identify effective strategies of increasing senior center adoption of an older adult falls awareness program. This study showed that senior centers offer many programs that can be adapted to falls prevention and that senior center directors are willing to deliver falls prevention education with high fidelity to the program's original design. The dissemination study also showed low program uptake by older adults, which is very consistent with other evaluation studies of falls prevention programs. To address this issue, I am co-leading a translational research study to identify factors that would increase older adult use of evidence-based multifaceted falls prevention strategies. I was also a co-investigator on an intervention evaluation study to examine the effectiveness of a medication review and modification program, delivered through community pharmacies, on the rate of falls and fall-related injuries among community-dwelling older adults in North Carolina. In addition, I have a strong track record of leading translational and intervention research studies in workplace violence prevention.

### B. Positions and Honors

#### Positions and Employment

1995-1996	Student Intern, Injury and Violence Prevention Program, Los Angeles County Department of Health Services, Los Angeles, CA
1996	Teaching Assistant, Epidemiologic Methods Graduate Course, Department of Epidemiology, University of California, Los Angeles, CA
1996-2001	Assistant Researcher (2001-2003), Staff Research Associate (1996-2001), Southern California Injury Prevention Research Center, Department of Epidemiology, University of California, Los Angeles, CA
1996-2002	Mathematics Instructor, Mount St. Mary's College, Los Angeles, CA
2003-2013	Associate Director for Research (2012-2013), Core Faculty (2003-2013), University of North Carolina Injury Prevention Research Center, Chapel Hill, NC
2004-2013	Research Associate Professor (2010-2013), Research Assistant Professor (2005-2010), Adjunct Assistant Professor (2004-2005), Department of Epidemiology, University of North Carolina at Chapel Hill, Chapel Hill, NC
2013-present	Associate Director for Education and Training, University of Iowa Injury Prevention Research Center, College of Public Health, Iowa City, IA
2013-present	Associate Professor, Department of Occupational and Environmental Health, University of Iowa, Iowa City, IA

## Honors

1996	Teaching Assistant of the Year, Department of Epidemiology, University of California, Los Angeles, CA
1996	Raymond Goodman Scholarship, School of Public Health, University of California, Los Angeles, CA
1997	Student Sponsorship, National Institute for Occupational Safety and Health Conference
1999	Student Research Award, Center for Occupational and Environmental Health, School of Public Health, University of California, Los Angeles, CA
2001	Delta Omega, National Public Health Honor Society
2001	Dissertation Workshop Awardee, Congress of Epidemiology 2001 Conference, Toronto, Ontario, Canada
2008	Featured, 2007-2008 Annual Report, Office of Research, University of North Carolina Gillings School of Global Public Health, New Investigator making a public health impact through research
2010	Recipient, 2009 Research Manuscript Award, Society for the Advancement of Violence and Injury Research

Violence Against Home Health and Hospice Workers  
The objectives of this project are to understand the interaction of organizational, worker and job characteristics and the external environment that contribute to and protect home health and hospice workers from violence, and identify the most effective strategies to intervene.
