Procedure Code Ranges and Type of Service

Note: Procedure codes ending in ‘T’ (i.e. 0001T, 0002T, 0044T) are CPT-Category III codes. They are temporary codes for emerging technology, services and procedures (experimental/investigational). The type of service is assigned to these based on the procedure performed. You will need to look these codes up in the CPT book to determine the type of service that should be used on these. These codes can be found after the Medicine section just before Appendix A.
