## Upon completion of this program, participants will be able to:

- Identify the frequent causes and spectrum of injuries that result from a work site electrocution.
- Describe the diagnosis and treatment of burn injuries and neuropsychological sequelae.
- Summarize current trends in case management.
- Identify current treatment and surgical options for common knee and shoulder work injuries.
- Discuss a multidisciplinary approach to common work injuries.
- Discuss difficult occupational medicine scenarios and how to best handle them.
- Identify legal issues with provider documentation of patient care, communications, and third-party inquiries.
