Subject: Job Opportunity at the National Institutes of Health

Dear Colleague;

The Biostatistics Research Branch at the National Institute of Allergy and Infectious Diseases is seeking candidates with a PhD in statistics or biostatistics. Statisticians in the group have three main functions: conducting independent research on statistical methodology, oversight of large collaborative medical studies, and small-scale collaborations with individual medical researchers. The problems are varied and interesting; opportunities include bio-defense, HIV/AIDS, immunology, transplantation, vaccine development, and bioinformatics.

Applicants should send their resume and three references or recommendation letters to Dean Follmann at dean.follmann@nih.gov. We plan to interview candidates in January/February 2018. I would be grateful if you could pass this notice on to potential candidates.

A job announcement will appear in Amstat News in December.

Sincerely,

Dean

Dean Follmann
Assistant Director for Biostatistics, NIAID
Chief Biostatistics Research Branch
BRB/ DCR
5601 Fishers Lane, Room 4C11
