

SYSTEMS THINKING

WHAT IS IT?

Having a strong emphasis on the study of relationships, working across organizational boundaries, and understanding that individual health is influenced by more than just individual behavior

Social Ecological Model

LEVELS OF THE MODEL

Individual: biological, personal history; attitudes, beliefs, and behaviors

Interpersonal: a person's relationships, partners, family, etc.

Community: Schools, workplaces, neighborhoods, etc.

Society: social and cultural norms; health, economic, educational, and social policies
