Innovative Analytics is seeking a **PhD Clinical Statistician**. We are looking for candidates with experience in the analysis of clinical data to add to our team. Experience within the contract research or biopharmaceutical industry is especially valued.

Requirements
- **PhD** (in statistics, biostatistics, or equivalent)
- Experience with clinical study designs and statistical analysis methods
- Familiarity with various types of clinical data and databases (including EDC systems)
- Ability to communicate effectively and provide clear directions to Statistical Programmers

Innovative Analytics is a company that challenges its employees yet understands that balance in life is important. If you would like to be considered for this opportunity send a cover letter and resume to us.

Founded by experienced pharmaceutical professionals in 2003, Innovative Analytics provides statistical and PK analysis, data management, data reporting, and medical writing services to drug and device companies across the clinical development life cycle.
