

## **Assistant Teaching Professor or Associate Teaching Professor of Biostatistics Position Department of Epidemiology and Biostatistics**

The Department of Epidemiology & Biostatistics of the Dornsife School of Public Health at Drexel University invites applicants for a non-tenure track Assistant Teaching Professor or Associate Teaching Professor position. The duties of this position are to teach in-person and online biostatistics courses at graduate and undergraduate levels, and to mentor master's level students. Teaching faculty are valued members of our department and school community and play integral roles in mentoring and curriculum design, as well as classroom instruction. Teaching faculty receive mentoring for career development and have opportunities for promotion.

We seek candidates who will uphold our values of diversity, equity and inclusion, and who are committed to upholding our School's mission of reducing health disparities, promoting health in all policies, and valuing health as a human right. We welcome the unique contributions that each person can bring to our community by their race or ethnicity, gender identity, sexual orientation, age, social class, immigrant status, and ability/disability status.

The Department of Epidemiology and Biostatistics currently offers MS and PhD degrees in Biostatistics, MPH, MS, and PhD degrees in Epidemiology, an undergraduate degree in Health Data Analytics and an MS in Population Health Sciences. We also offer a certificate in Epidemiology and Biostatistics. The Department has 34 faculty members spanning the two disciplines and is truly interdisciplinary.

We are soliciting applicants with a doctoral degree in biostatistics, statistics, or a related field, and a commitment to excellence in teaching and mentoring. Specific teaching assignments will be based on departmental teaching needs and the instructor's expertise, and may include courses at introductory, intermediate, or advanced levels. Successful applicants must demonstrate strong experience or potential for high quality teaching and mentoring.

This is a 12-month position, scheduled to begin in September 2023, with a possible option for an earlier start. Drexel University operates on a quarter system (four academic terms per year), and a full-time faculty member would be expected to teach courses adding to 18 quarter-credits per year, typically six 3-credit courses, which may be reduced during the faculty member's first year of employment. Faculty also serve as mentors for the master's students in the department. The faculty member will be assigned to teach in-person and/or online, depending on the Department's teaching needs. The faculty member is expected to be available on campus to teach, meet with student advisees, and participate in service activities.

The confidential application process requires a cover letter describing relevant experience and goals, a teaching statement, and a curriculum vitae, which should be submitted to [Careers at Drexel](https://careers.drexel.edu) ([careers.drexel.edu](https://careers.drexel.edu)). Please search by Department 6906, requisition # **XXXX**. Interested candidates may direct any questions to the search committee chair, Dr. Lucy Robinson ([lfr32@drexel.edu](mailto:lfr32@drexel.edu)). Applications will be accepted until a successful candidate has been identified; however, we will begin reviewing submissions February 1st, 2023.

### **Essential Functions**

- Teaching Biostatistics courses face to face and online
- Advising master's students on their applied practice experiences and culminating master's degree projects
- Engaging in service activities locally and nationally

### **Required Qualifications**

- Doctoral degree in Biostatistics or related field
