

The Center for Value-based Care Research (CVCR) at Cleveland Clinic is searching for a doctoral level Research Associate/Project Staff/Staff Scientist to collaborate with a multidisciplinary group of investigators working on federally funded projects in liver diseases. This is a full-time position consisting of 50% designing/programming decision models and 50% conducting observational studies. The position includes a non-tenured faculty appointment to the Cleveland Clinic Lerner College of Medicine of Case Western Reserve University at rank commensurate with experience. A doctoral degree in health services research, health economics, health policy, decision science, epidemiology, biostatistics and/or mathematics or a related field is required. Candidates should enjoy collaborating on and bringing creative analytic approaches to complex problems in health care. Participation in writing collaborative research proposals, grant applications, and manuscripts is expected. Excellent English written and oral communication skills are essential. Remote work is possible.

Interested candidates should email a curriculum vitae, the names of at least three references and a letter summarizing experience, research interests, and fit for the position to Phuc Le, PhD ([lep@ccf.org](mailto:lep@ccf.org)). Review of applications will begin immediately and continue until the position is filled. Title and salary are commensurate with experience.
